Informal observation and parent report may be used		t Check all that apply
y 3 months:	By 12 months:	Grook die tride appry.
Smiles at others	☐ Looks at a sma	ıll object (e.g. raisin, Cheerio)
Watches own hands	╡	niliar objects across room (8 – 10 feet)
y 6 months:	Looks at pictur	
Tracks rolling ball		ontainer for object
Shifts gaze between two objects Displays smooth-following ever movements in all	⊢ ⊢ollows rapidly	moving object
Displays smooth-following eye movements in all directions		

Child's name	Child's DOB ETID number	
By 24 months: ☐ Fixates on small objects ☐ Points to distant interesting objects outdoors ☐ Recognizes fine details in pictures ☐ Eyes exhibit ability to move together and point inward when looking at nearby objects (convergence) ☐ Shows well-developed eye accommodation; child's pupils constrict as objects get closer to their nose	By 36 months: ☐ Copies a circle ☐ Eyes smoothly move together and point inward when looking at nearby objects (convergence)	
Identify any behavioral observations which indicate a	concern about the child's vision:	
OBSERVATION OF THE EYES Check boxes to indicate all high-risk signs for vision impairment that are present. Check all that apply.		
Atypical appearance of the eyes: ☐ Drooping eyelid which obscures the pupil ☐ Persistent redness of conjunctiva (normally white) ☐ High sensitivity to bright light, indicated by squinting, closing eyes, or turning head away ☐ Obvious abnormalities in shape or structure of eyes ☐ Persistent tearing without crying ☐ Absence of a clear, black pupil ☐ Clouding of the eye	Unusual eye movements: ☐ Involuntary rhythmic/jerky eye movements (nystagmus) ☐ One or both eyes turning in/out/up/down ☐ Absence of eyes moving together, or sustained eye turn after four to six months of age	
Unusual gaze or head positions: Tilts/turns head when looking at an object Holds object close to eyes Averts gaze or seems to look besides, under, or above the object of focus	Absence of the following behaviors: Eye contact by age three months Visual fixation or following by three months Accurate reaching for objects by six months	
FINDINGS		
an Ohio El Vision provider.	I Vision Checklist indicate the need for review by I Vision Checklist that indicate the need for	

If the EI vision provider determines a need for a referral for a vision evaluation, the EI Service Coordinator will support the parent in making the referral and obtain consent to share the Vision Checklist with the child's primary care physician and/or the ophthalmologist/optometrist.
