

FORM EI-17: EXTRAORDINARY MEDICAL EXPENSES WORKSHEET

GUIDANCE RESOURCE

Form Overview

Form EI-17 is used to determine the out-of-pocket medical expenses that a family who has been determined “able to pay” is required to meet before they can be determined unable to pay.

This form is used the same way as Form EI-15 when determining a family able to pay with the family income. Families will provide a pay stub for each working adult in the home. The early intervention service coordinator (EISC) will determine the family’s total annual income. By using the tools provided by the department, the EISC will calculate the out-of-pocket expense that the family must meet to be determined unable to pay.

EISC Explanation of Form to Parents

N/A
